TAINET's GNTU 764/10x series, which takes advantage of the latest G.SHDSL.bis standard, is a mini-terminal enabling the transport of traffic from Ethernet interface over 15M/30M/60M bps G.SHDSL.bis link.

The GNTU 764/10x series is a EFM G.SHDSL.bis transmission equipment for FE signal extension, aggregate FE channel into a G.SHDSL.bis link. The automatic line rate can be up to 15Mbps over 2-wire cooper line. Embedded Operation Channel (EOC) is built between local and remote sides for system configuration, testing, performance and alarm monitoring of E/FE channel and G.SHDSL.bis link.

SNTU764 is a series of G.SHDSL modems and routers adopting TC-PAM 16/32/64/128 line coding.
