

## Overview

Cisco unified IP phone CP-7962G is designed to support wideband voice performance to meet the needs for cooperation managers or administrative. CP-7962 is the part of a new suite of evolutionary Cisco Unified IP phone 7900 Series endpoint. The phone has full-feature IP phone system with speakerphone, handset. The phone can also easily lead you through all call features and functions via 6 programmable and 4 interactive soft keys. The 5-inch, high resolution graphical grayscale LCD panel on the phone displays the information about time, data, callers and status. The setting key allows user to adjust display from background template, and select ringer sounds through the user Preference menu. Network Configuration preferences also can be set up (usually by the system administrator). Services key allows users to quickly access diverse information such as weather, stocks, quote of the day, or any Web-based information using XML.

\*Note: The phone can be powered by either POE Ethernet switch or phone power supply, the power supply does not include by default, customer need to purchase separately.
